INTRODUCTION

This report gives final figures on the wage and salary earnings of wage and salary earners during the 12 months prior to June, 1961, cross-classified by marital status, age and sex, for Canada and the provinces and the census metropolitan areas of cities of 100,000 population and over, as reported at the June 1, 1961 Census.

The 1961 Census labour force includes all persons, 15 years of age and over, who were reported as having a job of any kind, either part-time or full-time (even if they were not at work) or were reported as looking for work, during the week prior to enumeration. In urban localities the major portion of the enumeration extended over the first two weeks in June, and in rural areas over the first three weeks.

Figures in this report relate to that segment of the labour force reported as wage or salary earners, i.e. persons who worked for others for wages, salary, tips or piece rates or who worked for others in non-family enterprises for payment in kind.

Earnings.—By earnings is meant the total amount of money received by wage-earners as cash wages and salary, Armed Forces' and Reserve Units' pay, commission, tips or piece-rate payments from all employers during the 12 months prior to June, 1961, before deductions for such items as income tax, unemployment insurance, medical plans, union dues, pension plans or insurance plans. Value of free room and board and reimbursement for travel or other expenses are not included.

The "average" earnings shown in this report are obtained by dividing the aggregate earnings for wage-earners in the age group and marital status concerned by the number of wage-earners with stated earnings in that age group and marital status. It should be noted that average earnings reflect the dependency of earnings on the number of weeks of employment and the number of hours usually worked, especially in the case of female wage-earners, since a greater proportion of females than males are engaged in part-time employment.

Age.—In the 1961 Census, this refers to the person's age at his or her last birthday prior to June 1, 1961.

Marital status.—The "married" classification includes married persons, who, at the time of the census, were living apart for any reason, including those where legal separation proceedings may have taken place.

Census metropolitan areas.—Metropolitan areas as defined for the census relate to groups of urban communities in Canada which are in close economic, geographic and social relationship.

Le présent rapport donne, pour le Canada, les provinces et les zones métropolitaines de recensement des cités de 100,000 habitants et plus, les chiffres définitifs sur le gain des employés à salaire et à traitement durant les 12 mois antérieurs à juin 1961, classés suivant l'état matrimonial, l'âge et le sexe, d'après le recensement de 1961.

La main-d'oeuvre recensée en 1961 comprend toutes les personnes âgées de 15 ans et plus qui ont été inscrites comme ayant un emploi quelconque, à temps partiel ou de plein temps (même si elles n'étaient pas au travail) ou comme ayant cherché du travail la semaine précédant le recensement. Dans les localités urbaines, le dénombrement a été fait en majeure partie durant les deux premières semaines de juin, et, dans les régions rurales, durant les trois premières.

Les chiffres contenus dans le présent rapport ne s'appliquent qu'au secteur de la main-d'oeuvre classé "salariés" c'est-à-dire, les personnes qui ont travaillé pour autrui moyennant salaire, traitement, pourboires ou rémunération à la pièce, ou pour autrui moyennant rétribution en nature, dans des entreprises non familiales.

Gain.—On entend par revenu provenant des salaires la somme totale reçue par les salariés en salaires et traitements, la solde des Forces armées et des unités de réserve, les commissions, les pourboires ou la rémunération à la pièce de tous les employeurs durant les 12 mois antérieurs à juin 1961, avant déductions pour impôt sur le revenu, assurance-chômage, plans de soins médicaux, cotisations syndicales et régimes de pension ou d'assurances. La valeur de la chambre et de la pension et les remboursements de frais de déplacement ou autres ne sont pas inclus.

Le gain moyen indiqué dans ce rapport est obtenu en divisant le gain global des salariés du groupe d'âge et de l'état matrimonial visés par le nombre de salariés dans le groupe d'âge et l'état matrimonial dont le gain est déclaré. Il faut remarquer que le gain moyen indique dans quelle mesure le gain dépend du nombre de semaines d'emploi et du nombre ordinaire d'heures de travail, surtout dans le cas des femmes salariées parce qu'une plus forte proportion de femmes que chez les hommes est engagée dans des emplois à temps partiel.

Âge.—Au recensement de 1961 il s'agissait de l'âge d'une personne à son dernier anniversaire antérieur au 1er juin 1961.

État matrimonial.—Le groupe des personnes "mariées" comprend celles qui, à la date du recensement et pour quelque raison, vivaient à part, y compris celles qui étaient séparées juridiquement.

Zones métropolitaines de recensement.—Les zones métropolitaines de recensement sont des groupes d'agglomérations urbaines étroitement liées par leurs intérêts économiques, géographiques et sociaux.
